bus, modis. Nam prima persona plura-
lis numeralium pedem accipit in 1. con-

sita verba *abdicamus*, *abluimus*.

Idem argue in nominum decli-

alius est genitivus 1. & 2. declinatio-

Supererant præterita, & tempora ab iis dependentia, quæ ex participiis erui non poterant. Huic inopiæ & malò ut occureremus, addidimus auctarium præteritorum fol. 104.

Ex comparativis & superlativis quoque nonnulla exempla sparsim damus, ut te amice lector radio ea ex positivis rimandi sublevaremus.

Vt si laudandā suscipias laurum, eam attribues monti reperto sub eo pede, quem tuum metrum postulat. vt *Lauro Caesar coronat tempora.* dic. *Lauro Martini gloriā Caesar coronat tempora.* Verum nihilominus etiam est, requiri aliquam eruditionem, vt ne quis contra veritatem peccet, & laurum Rhiphæo attribuat. Quare hæc eruditio secundior est eruditis. II. Propria faciem præferunt intelligendis adiectivis, & patronymicis, quæ in 3a. libelli parte à fol. 117. afferuntur.
